Introduction to Xnet Trader

The application Xnet Trader is a complete monitoring service for stock information in real time (price watch). It enables the user to directly insert and manage orders and trades of investors/end-users in the electronic trading system OASIS .

This new service daily, reliably and effectively brings the stock market developments to the user's computer screen, equipping the investor with a really dynamic tool for portfolio management and order integration, thus providing a range of services, such as:

1. Connection to stock markets (ASE, CSE, ATHENS DERIVATIVES EXCHANGE, ENEX DERIVATIVES)
2. Direct Market Access (DMA)/Order Routing in real-time
3. Security and reliability in transactions
4. Personal Portfolio Management in real-time
5. Support of the new service from the Athens Stock Exchange

Installation

For installation instructions see the following sections:

[System requirements](#)

[Application Setup](#)

System requirements

The application runs on any modern system that supports Java version 1.8 and above. The application is based on Java Web Start and can be launched from all browsers or from the command line. Note that the browser does not play any other role beyond the initial selection (click) of a web link. The Java Web Start technology is supported by the following operating systems: Windows XP, Windows Vista, Windows 7, Windows 8, Windows Server 2008 (x86 versions and x64), Linux (any version, x86 and x64) and Mac OS X.

At least 1GB of free memory is recommended for the application, which means that, depending on other applications that could be running on the users workstation, the system recommended total memory is 3GB and above.

The application has initial disk space requirements of at least 200MB. During the execution of the application more space may be required for temporary file creation, PDF display, etc. Therefore, for optimal user experience, about 1GB of disk space is recommended for application execution.

The application works with all types of screens, however, for optimum user experience, we recommend using a 16x9 display (wide screen), of at least 17", with a resolution of at least 1600x900 or FullHD (1920x1080).

Depending on the number of securities being watched, the available Internet bandwidth recommended is at least 1Mbps. For optimum user experience DSL-2 connections with a wired terminal to the network is recommended.

Application Setup

With the Java Web Start technology that is used, the application is readily available online. No installation is required. The application starts by clicking a web link contained on a website, or directly from the command line of the system.

Each time it is run, the application is cached on disk (cache) so the next time it starts faster, without having to be downloaded again from the network.

The user does not need to update the application, because every time it starts, it automatically checks if the locally saved version is the most updated, otherwise, the latest version is automatically downloaded from the network. In this way the application always runs in the latest version available.

The application needs a local installation of Java version 1.8 or above. You can download the latest version of Java from the link <https://java.com/getjava>.

In order to run the application by clicking on a website link the Java Plugin must be enabled. If the activation of the Java Plugin is not desired, the application can run without it, by entering the following command to the system command line: `javaws [URL]`, where [URL] is the web link, or the application can run by creating a shortcut with the aforementioned command, on the user's desktop.

Connection

Insert your credentials to the following Login picture :

The screenshot shows the XNetTrader application window. At the top, there are logos for EnEx Energy Exchange Group and UAT Derivatives Powered by Athexgroup. Below the logos, there are input fields for Username, Password, and Certificate. A Language dropdown menu is set to English, with options for English, Ελληνικά, and Ελληνικά(en). There is a Save checkbox and an Enter button. A 'Create new password' button is also present. The bottom of the window displays 'Version 6.3.7.0' and 'Copyright 2020 AthexGroup'.

Username: write your username

Password: write your password

Press the button **Enter** to connect

Also you can press the button **Cancel** to cancel the connection

You can select the **English interface** of the application if you select **English** in the field **Language**
 You can select the **Greek interface** of the application if you select **Ελληνικά** in the field **Language**
 You can select the in **Greek Interface** of the application with **English symbols** if you select **Ελληνικά /En** in the field **Language**

Desktop (dockable)

The Xnet Trader application is organized in display units called “desktops”, where the various functional UI components (“Application Windows”, or simply “windows”) are placed. You can create various Desktops, and use these to organize related sets of information and functions. Any number of Desktops can be created and saved.

The “Application Windows” (the functional UI components of the application) are dockable, i.e., they can be dragged with the mouse and moved around a Desktop, so that they are “docked” to any of the four edges of the Desktop (top, bottom, left, right). Application Windows can also be floating, i.e., they can “float” inside a Desktop as if they were standalone windows. This is the default for all new Application Windows. Dragging an Application Window towards the center of the screen makes it float again.

For more information you can see:

[**Setting up a Desktop by arranging Panes**](#)[**Screens of application**](#)[**Save a Desktop**](#)[**Loading a saved desktop**](#)[**Shortcut Buttons**](#)[**Icons and their usage**](#)[**Create a shortcut icon on the desktop**](#)

Setting up a Desktop by arranging Panes

In order to set up a Desktop, first create a new Application Window; by default the window will come up floating. Then, using the mouse, drag the window near any edge of the Desktop. A rectangle will appear indicating that the window will be placed there if you release the mouse button.

The above process can be repeated over and over, until all desired Application Windows are docked in place, forming the desired Desktop. The Panes can be resized at any time. Already-docked windows can also be moved around and docket to other edges, or turned again into floating ones.

When you exit of the application and connect again to it, the Desktops you have stored and the Application Windows therein appear exactly at the same position as the last time.

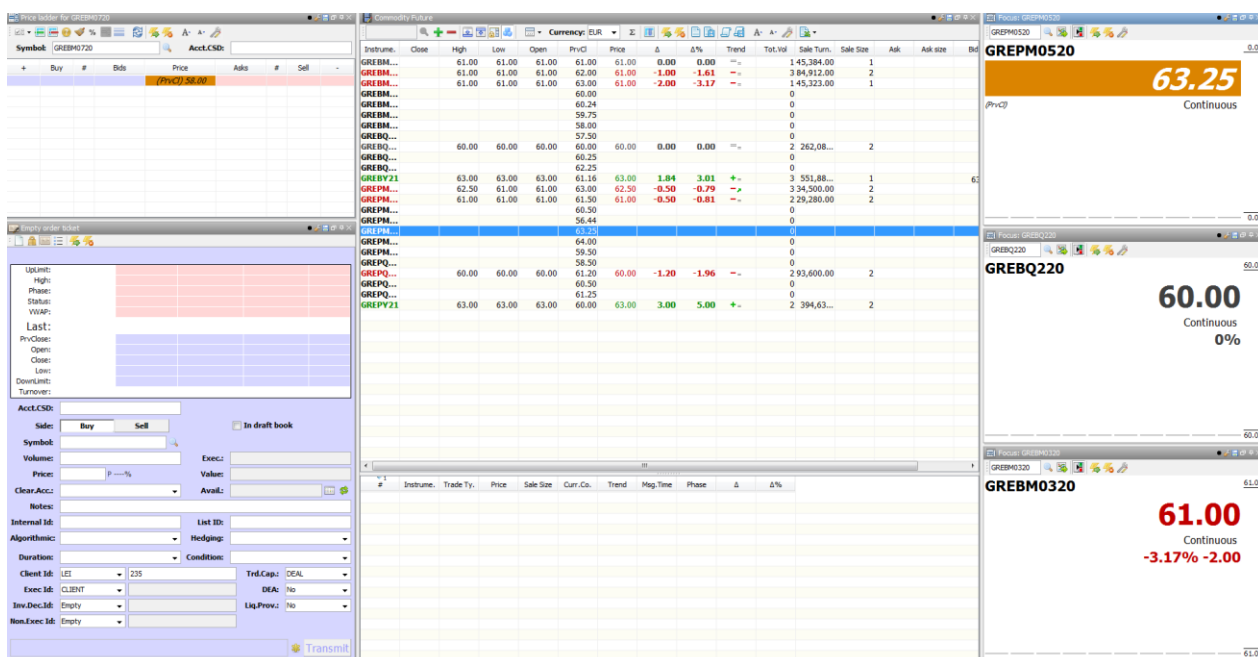

To create a new Desktop press the green cross located at the top of the main application’s window and type in the name for your new Desktop. This creates an empty Desktop, where you can arrange Application Windows as explained above.

You can delete a Desktop by pressing the **X** button located in the upper right corner of the application as shown below.

The following picture shows a Desktop with various Application Windows arranged in it.

On the top of your desktop you can see information about the account and your environment:

GD.ATH: 833.34 0.00% 11:47:14 ATHEX Total Value : 20.80

Save a Desktop

Once you have created a Desktop and arranged it as desired, you can store it in one of the following ways:

- ✓ From the main application menu (**Xnet Trader → Save**)
- ✓ When disconnecting from the application, all Desktops are saved and the next time you connect, the application will load the Desktops just as they were last time.
- ✓ You can save floating with the selection of option Save or close the application

Application windows

Inside a Desktop any Application Window can be placed. Below is a list of some of those windows:

Watchlist :On the watch list window you can watch securities, indices, derivatives, etc. that you wish, as well as their movement during the trade day

Technical Analysis :The application supports a wide range of charts and technical analysis tools, from which you can easily follow graphs for all securities and indices and conduct technical analysis.

Technical analysis is the analysis of market information, such as market volumes and prices, to assess the future price movement taking into account the securities past and recent behavior. The past movement of the price is helpful in performing the analysis. The historical prices of a product are depicted in a diagram, divided into different time intervals. You can analyze data in diagrams of various time intervals so as to determine the entry and exit points for your trades

Order Ticket :On the order ticket window you can enter buy and sell orders. The order ticket window ensures that the entered order data are ready for the order entry.

Price Ladder: On the price ladder window the user can watch the market depth in real time

Order List: On the order list window you can watch the movement of orders

Trade List: On the trade list window you can watch the movement of trades

Focus: From the focus window the use can see a graphic depiction of a symbol's trades

Intraday: You can see the intraday sales of the current trade da.

Alerts: You can see alerts for specific symbol and price that you want

Reports: You can produce different kinds of reports

Options: You can modify the options of orders and you can also modify the fonts and colors of the windows

News: You can watch the news for the available Markets

Otc: You can watch the Otc Trades

Market Ticker: You can watch the Market Ticker for the available Markets

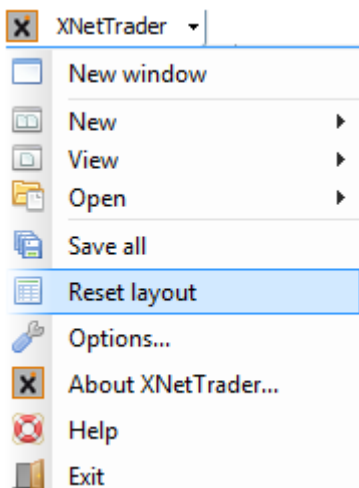

Reset Layout

We created the user "templateuser" in order to modify the default desktop in **Xnet Trader**.

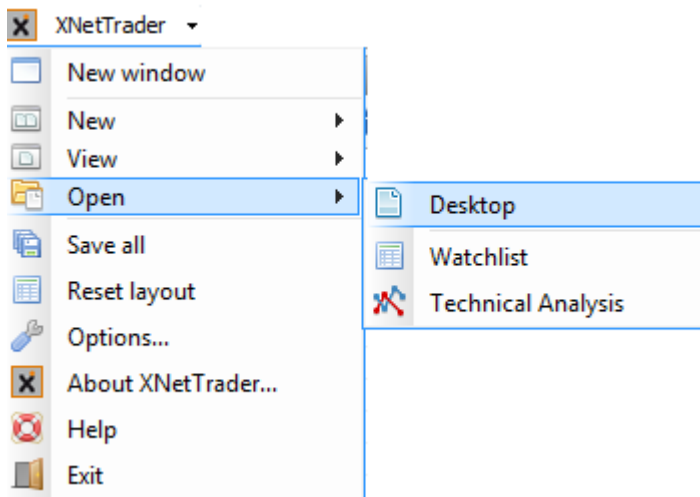

You can login with this user and modify your destop/desktops

The desktops that belong to this user will be given to all users of the application with the first login.

Also, if a user wants to restore the default desktop, he should select the "Reset Layout" from the menu MARKETorder as you can see in the picture below:

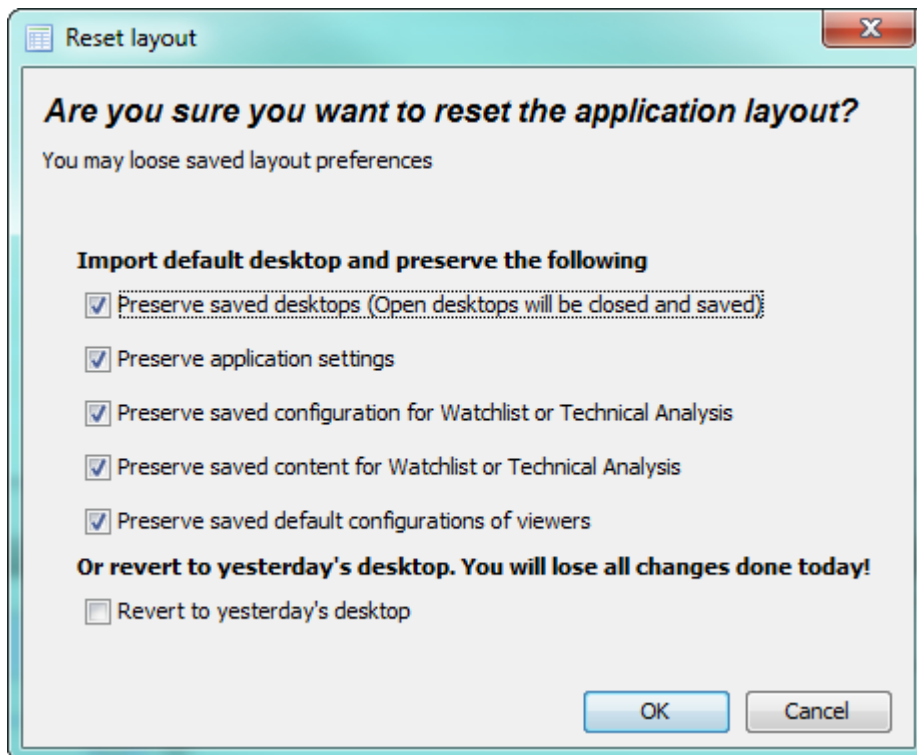

When you finish the reset you can restore all the previous desktops from the main menu as you can see below:

Select your desktop/ desktops and press the button Load

If you want a full reset, you must uncheck the follow options and press the button OK.

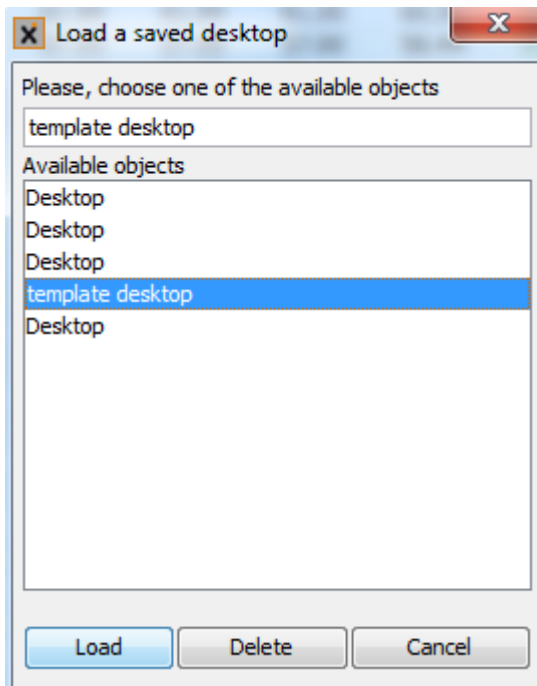

When you login to the application after the full reset you can see only the desktop of templateuser. If user check the five initial choices then you can preserve saved desktops, preserve application settings, preserve saved configuration for watchlist or Technical Analysis window, preserve saved content for Watchlist or Technical Analysis and preserve saved default configuration of viewers.

If you want to revert the yesterday's desktop you must check the option "Revert to Yesterday's desktop". You will disconnect from the application so when you log on in the application again you will see the desktop that you had yesterday. You will lose all changes that done today in your desktop.

Notice: If you make some changes to the default desktop (template user), the users must select the "Reset Layout" from the menu XnetTrader to see these changes.

Loading a saved desktop

If you have created and saved a Desktop and afterwards you close it (by pressing the **X** button), the Desktop disappears. In order to make the Desktop re-appear, you can use the menu **Xnet Trader → Open → Desktop** displayed the following window:

Select the Desktop that you want to load and click the **Load** button. The selected Desktop will appear. Furthermore, you can click on **Cancel** to cancel the load desktop operation, and you can use Delete to delete a saved desktop.

Shortcut Buttons

In all the Application Windows, you can use shortcut keys to quickly perform some predefined functions. Shortcuts keys are:

- F1:** Display the help menu
- F2:** Move the focus to the appropriate field to type
- F3:** Search
- F4:** Alternate between a buy order and a sell order, and also place a new order
- F5:** Switch to another account
- F6:** Edit order
- F7:** Cancel order
- F8:** Execute order or refresh the order ticket
- F9:** Display technical analysis chart
- F10:** Display the details of the list-of-trades and the properties status of a symbol
- F11:** Display the intraday trades of a symbol
- F12:** Display the price ladder of a symbol
- ESC:** Close a floating Watchlist window
- Ctrl+F11:** Hide/show the view management toolbar
- Ctrl+F12:** Hide/show the window's title toolbar

Ctrl+(+/-) on mouse wheel : Increases/Decreases the font size

Ctrl+F7: The user may close position for a symbol

Ctrl + a : Mark/Unmark all the displayed columns and with space bar select/unselect all of them

Icons and their usage

: With this icon you can select the color group of the window that you want. Windows that are the same color group can synchronize symbols and products that are chosen on a window of the group.

: With this icon you can toggle the view management toolbar

: Use this icon to save as default configuration for window

: Use this icon to float the window

: With this icon you may minimize the window

: Use this icon to auto hide a window

: Use this icon to can close a window

: Use this icon to create a new order based on the default

: Use this icon you can change the viewing settings

: Use this icon to cause order ticket data to remain after order entry or stop scrolling

: Use this icon to show details for a symbol

: Use this icon to submit an order without confirmation

: Use this icon to save as default configuration for window

: Use this icon to delete default configuration for window

: Use this icon to increase the size for grid font

: Use this icon to decrease the size for grid font

: Use this icon to suspend scrolling of the ticket window

: Use this icon to view the details for the customer

: Use this icon to view the details of the order

: Use this icon to view the percentage change of price from the previous close

: Use this icon to refresh the data shown on the current window

: Use this icon to change the title of this window

- : Use this icon to show/hide totals
- : With this icon to minimize/restore the top pane (ticker trades) of a Watchlist
- : Use this icon to minimize/restore the bottom pane (portfolio) of a Watchlist
- : Use this icon to select the columns to display
- : Use this icon tool to search for symbols, investors etc.
- : Use this icon to insert the symbol at the bottom of the grid
- : Use this icon to delete the selected symbol
- : Use this icon to load a saved Watchlist, Technical Analysis graph or a Desktop
- : Use this icon to save a saved Watchlist, Technical Analysis graph or a Desktop
- : Use this icon to load a saved configuration
- : Use this icon to save a configuration
- : Use this icon to link/unlink/watch and edit in a spreadsheet file
- : Use this icon to set the main symbol of a chart
- : Use this icon to add (overlay) a new symbol to a chart
- : Use this icon to set the initial time scale of a chart
- : Use this icon to select the time interval between chart points
- : Use this icon to watch the history of the symbol which displays in your chart
- : Use this icon to select the chart type
- : Use this icon to select the cursor style for a chart
- : Use this icon to select the Y axis type
- : Use this icon to toggle display options on/off
- : Use this icon to select a simple drawing tool
- : Use this icon to select a complex drawing tool

: Use this icon to add annotations to your graph

: Use this icon to add shapes to your graph

: Use this icon to set up snapping to a graph

: Use this icon to pin the current tool

: Use this icon to add a study to a chart

: Use this icon add a study to the chart

: Use this icon to acknowledge all done-for-day orders

: Use this icon to clear all acknowledgements for done-for-days orders

: Use this icon to hide previously acknowledged done-for-day or canceled orders

: Use this icon to highlight canceled orders using a distinctive background color

: Use this icon to highlight done-for-day orders using a distinctive background color

: User insert an empty line above the elected line on the watchlist window

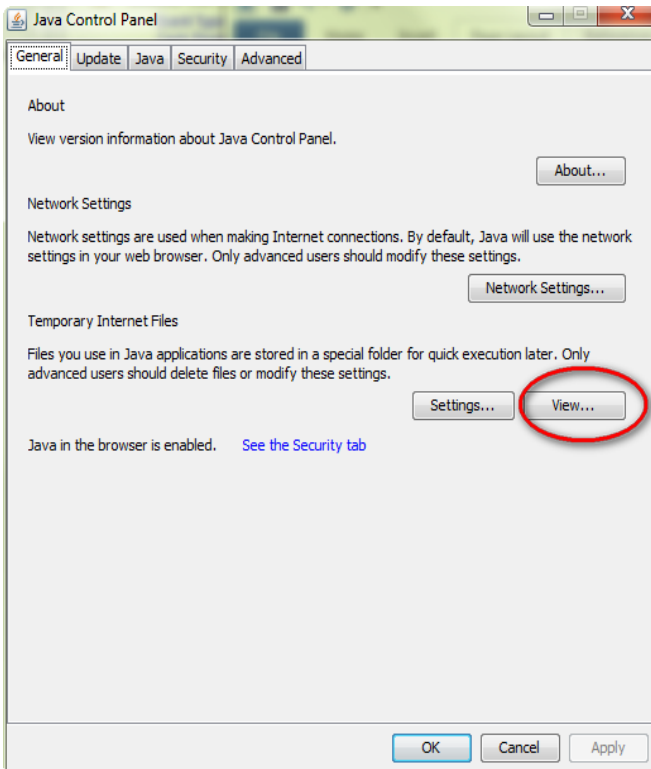

: Use this icon to select Market , categories, company watchlists, sectors,index participation

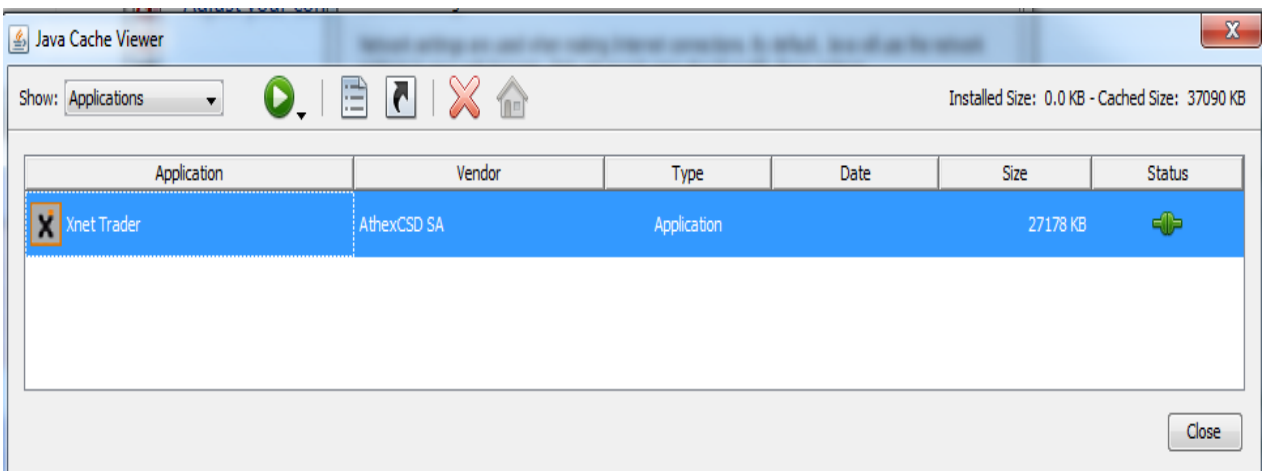

Create a shortcut icon on the desktop

To create shortcuts on your desktop do the following steps:

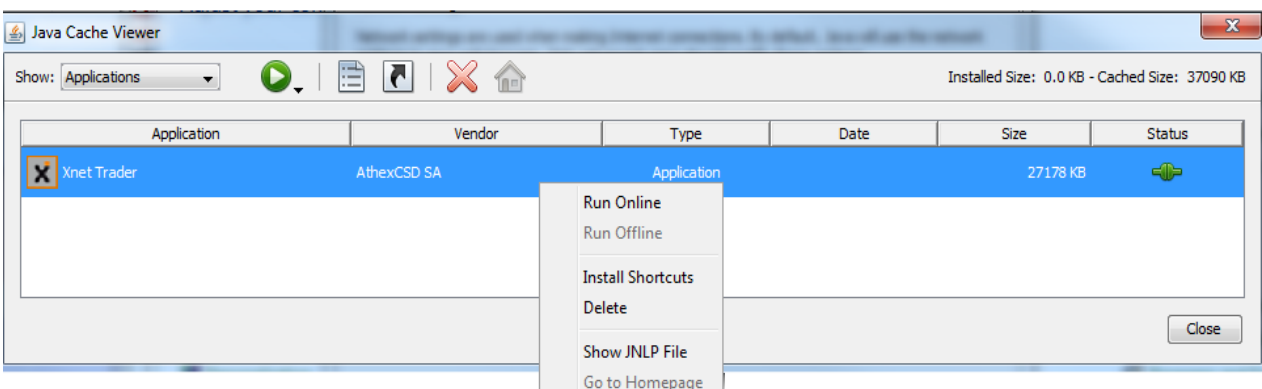

After you make login to the Xnet Trader you go to the control panel and you find the icon of Java press double click on this and on general tab chose the tab View:

You display the follow screen:

Press on the icon xnet trader and with double click you select the install shortcuts and then you can create the shortcut of application in your desktop:

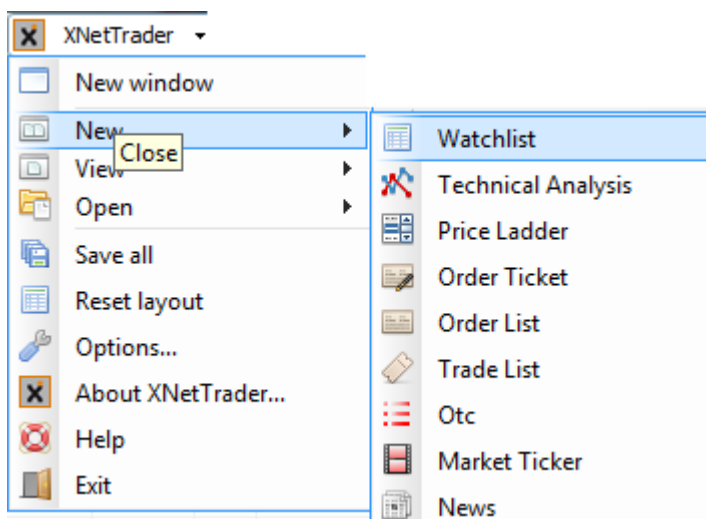

The shortcut icon is the follow:

Watching prices and markets

You can watch the prices and markets from the menu **Xnet Trader → New → Watchlist**

For watching prices and symbols see the following sections:

[Watching symbols](#)

[Available columns in Watchlist Window](#)

[Searching for symbols](#)

[Search symbols under market and type](#)

[Watching based on market, instrument type and filters](#)

[Market Statistics](#)

[Save the watchlist window](#)

[Load a saved Watchlist window](#)

Watching symbols

In Watchlist window the user may see the depth of the instrument with double click on the symbol in the Watchlist window depending on the product that the user has as you can see in the following picture:

After having added some symbols to a Watchlist window, you can:

- Delete symbols from the Watchlist by clicking on 
- Add symbols from the watching list by clicking on 
- Hide or restore the trades ticker pane by clicking on 
- Hide or restore the portfolio pane by clicking on 
- Suspend scrolling of the Watchlist window 
- To select a Market ,categorization of symbols ,company watchlist, index composition and sectors click on the 
- To rename a Watchlist window click on the  icon.
- To change the currency click on  . A list will appear allowing you to select another currency.
- To display /hide the totals at the bottom of the Watchlist window click  .
- To add/remove the displayed columns to a Watchlist window, click on the  icon. A list of the available and visible columns will appear. You can choose with check  the columns that you desire to see in the watchlist window. Also you press right click on the list name and choose

"Other Columns" then you see a list that you can select or unchecked the columns in the watchlist window

- You can save save as default the configuration for window by clicking on the  icon
- You can delete the default configuration for window by clicking on the  icon
- You can load a saved Watchlist by clicking on the  icon.
- You can save the current Watchlist by clicking on the  icon.
- You can open a saved Watchlist configuration with this icon 

- You can save the configuration of the current Watchlist window 
- You can increase the grid font size by clicking on the icon 
- You can delete the grid font size by clicking on the icon 
- You can change the appearance of the Watchlist window by clicking on the  icon
- You can watch symbols on a spreadsheet file by clicking on the  icon. You can also edit the spreadsheet file

The screenshot displays the 'Commodity Future' trading platform. The main window shows a list of trades for the symbol GREBM0320. The table includes columns for Instrument, Close, High, Low, Open, PivCl, Price, Delta (Δ), Delta Percent (Δ%), Trend, Tot. Vol, Sale Turn., Sale Size, and Ask. The trades are listed in descending order of time, with the most recent trade at the top.

| Instrument | Close | High | Low | Open | PivCl | Price | Δ | Δ% | Trend | Tot. Vol | Sale Turn. | Sale Size | Ask |
|------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|----------|------------|-----------|-------|

| GREPM... | | | | | 58.50 | | | | | 0 | | | |
| GREPM... | | | | 60.00 | 61.20 | 60.00 | -1.20 | -1.96 | = | 2 | 93,600.00 | 2 | |

A context menu is open over the first trade, showing options: Remove selected, Insert separator, Price ladder for GREBM0320, Buy GREBM0320, Sell GREBM0320, Symbol properties, Technical Analysis, Intraday View, Focus, Otc, News, and Statistics.

The bottom section of the interface shows a detailed view of the first trade (GREBM0320) with columns: #, Instrument, Trade Ty., Price, Sale Size, Curr. Co., Trend, Msg. Time, Phase, Δ, and Δ%.

| # | Instrument | Trade Ty. | Price | Sale Size | Curr. Co. | Trend | Msg. Time | Phase | Δ | Δ% |
|---|------------|-----------|-------|-----------|-----------|-------|-----------|-------|------|------|
| 1 | GREBM0320 | Buy | 61.22 | 10 | EUR | | | | 0.22 | 0.36 |

- At the bottom of the Watchlist window a trade ticker pane is shown, as in the picture below:

[illegible]

By right-clicking on a symbol in a Watchlist window, the following actions are possible:

- ✓ **Remove Selected:** Deletes the selected symbol
- ✓ **Insert Separator:** Insert a separator row in the watchlist window
- ✓ **Price Ladder:** Displays a Price Ladder window for the selected symbol
- ✓ **Buy equity:** Displays a "buy" Order Ticket window for the selected symbol
- ✓ **Sell equity:** Displays a "sell" Order Ticket window for the selected symbol
- ✓ **Symbol properties :** Displays a window showing details for the selected symbol
- ✓ **Technical Analysis:** Displays a Technical Analysis window for the selected symbol
- ✓ **Intraday View:** Displays intraday information for the selected symbol, including buy/sell side, trade type, time, price, quantity, and phase of trade.
- ✓ **Focus:** Displays the Focus window (shows price difference using a color code of red for a downwards change, green for an upwards change and gray for no change)
- ✓ **Otc:** Displays the Otc Window (in parenthesis the number of otc that exist)
- ✓ **News:** Displays the current news and for previous dates
- ✓ **Statistics:** Displays the statistics for the symbol

- **Δ-Special Terms** : Δ-Special Terms

Also you can see in the watchlist window in the trading table you have two options to add or remove columns. First you can press on the column's name and with right click choose the option "Other Columns" and add or removed selected columns and second option is to select "Choose Table columns" and add or remove columns

The Available columns in the trading window described below:

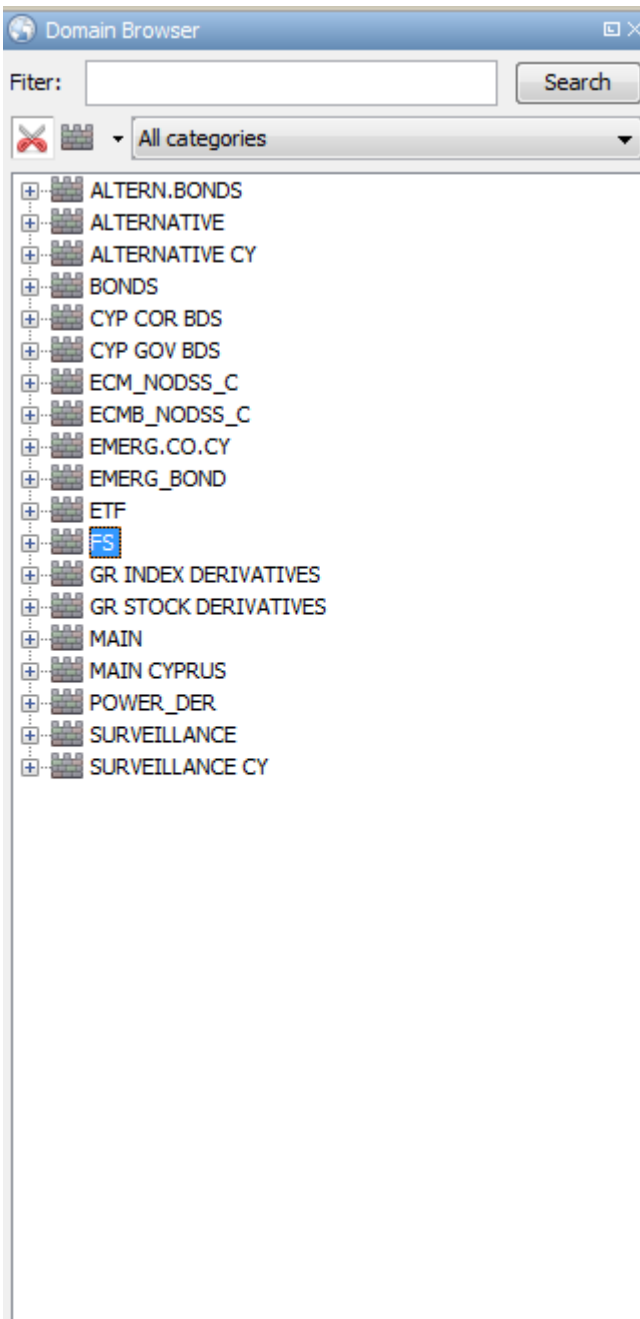

- **#** : Serial number of the trade
- **Curr. Code** :Currency code
- **Instrument**:The name of instrument
- **Message Time**:The time of message
- **Phase** :Instrument Phase

- **Price** : Last Price of any trade type
- **Sale Size** :Last Size of any trade type
- **Trade Type** :Last Trade Type
- **Trend** : $\Delta\%$ and Δ
- **Δ** :Change of Price from Previous Close Price
- **$\Delta\%$** :Change % of Price from Previous Close Price

Searching for symbols

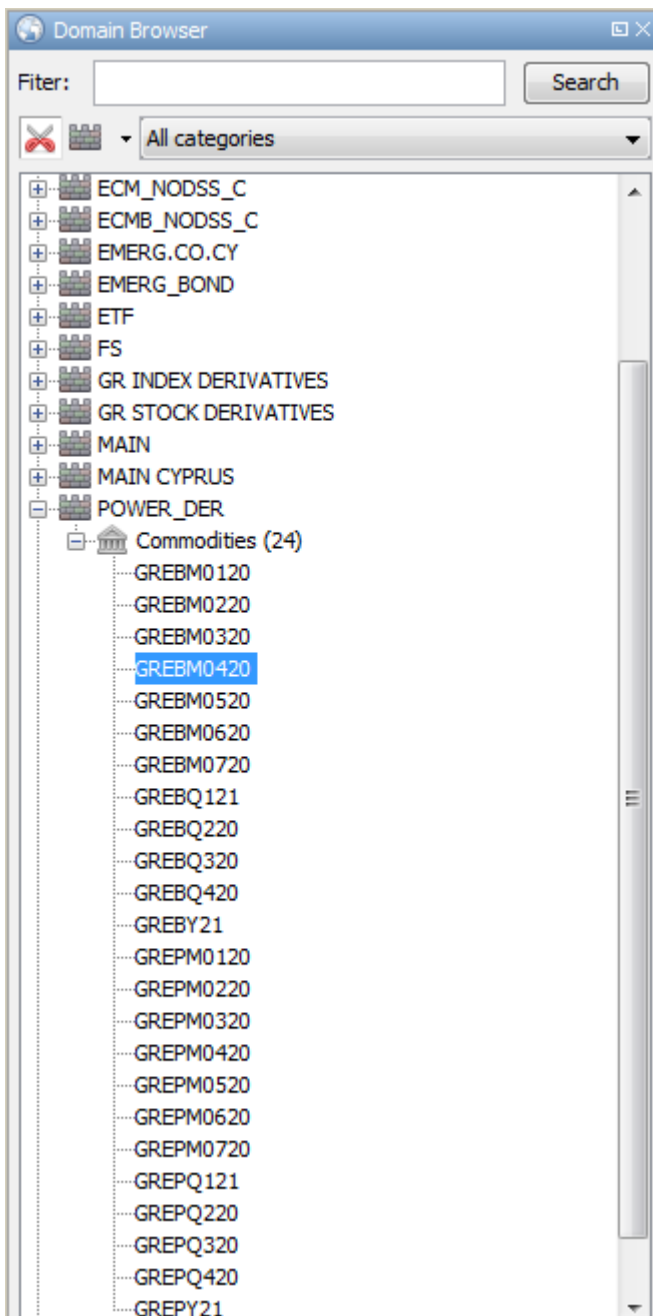

To search for a symbol (for the Watchlist window, or any other window), go to the main Menu **Xnet Trader** → **View** → **Domain Browser**

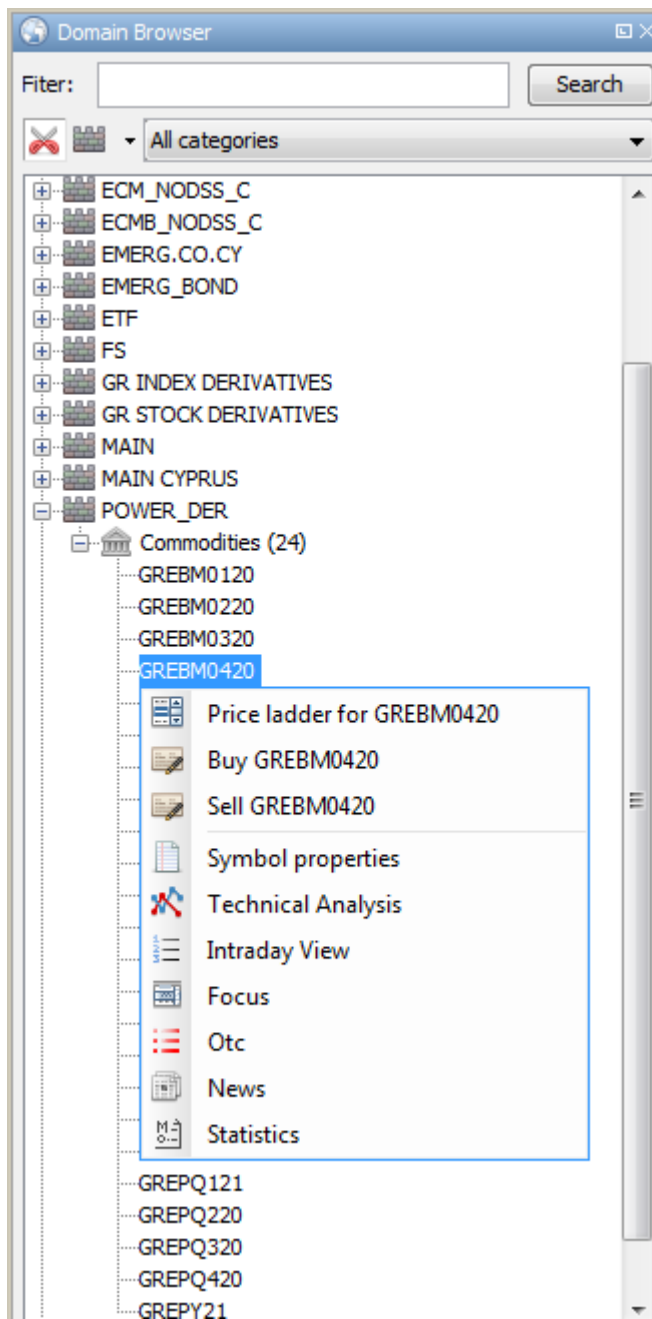

The above window is displayed, which shows markets and their symbols in a tree layout. By clicking on the '+' in front of a market a second-level view shows the available instrument types, e.g.:

Clicking on the '+' in front of a category expands it a list of symbols.

By selecting a symbol and right-clicking on it the following options exist:

Price Ladder: Displays a Price Ladder window for the selected symbol

Buy: Displays a "buy" Order Ticket window for the selected symbol

Sell: Displays a "sell" Order Ticket window for the selected symbol

Symbol Properties: Displays a window showing details for the selected symbol

Technical Analysis: Displays a Technical Analysis window for the selected symbol

Intraday View: Displays Intraday information for the selected symbol, including buy/sell side, trade type, time, price, quantity, and phase of trade

Focus: Displays the Focus window (shows price difference using a color code of red for a downwards change, green for an upwards change and gray for no change)

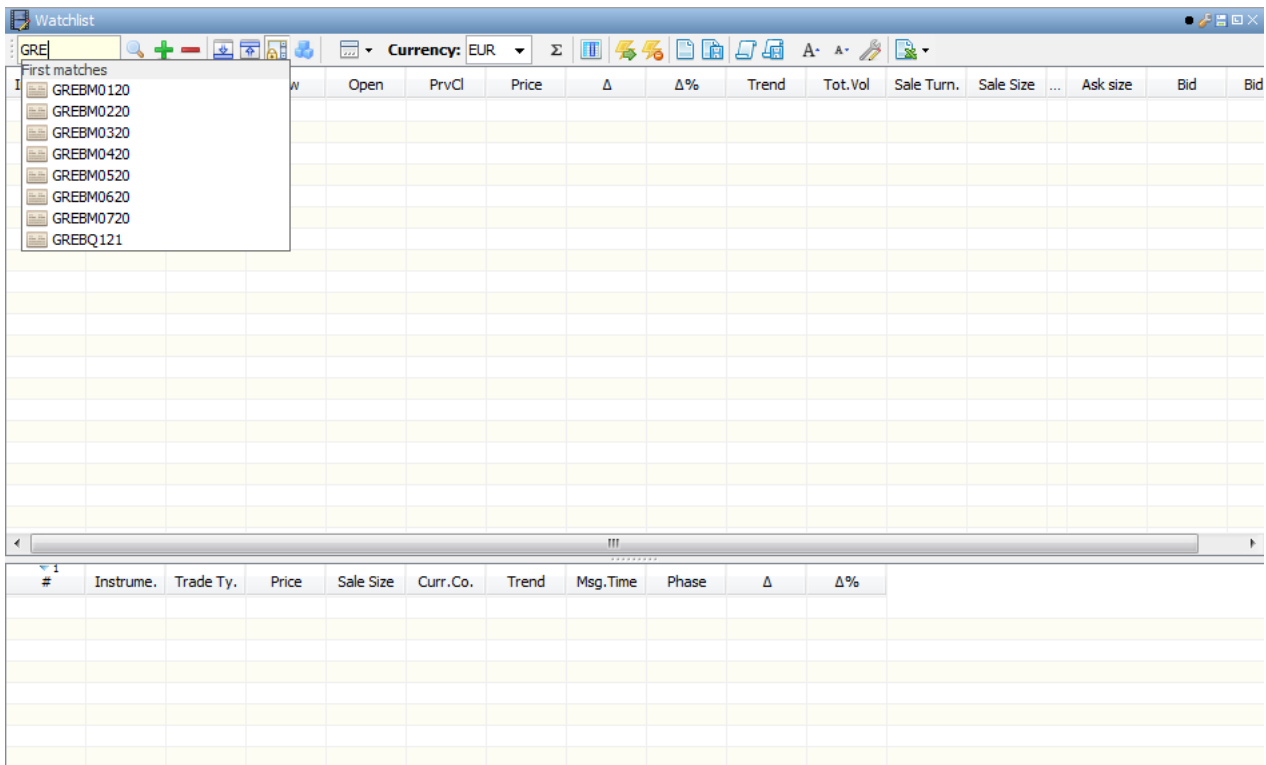

Otc: Displays the Otc for the selected symbol

News: Displays the current news and for previous dates

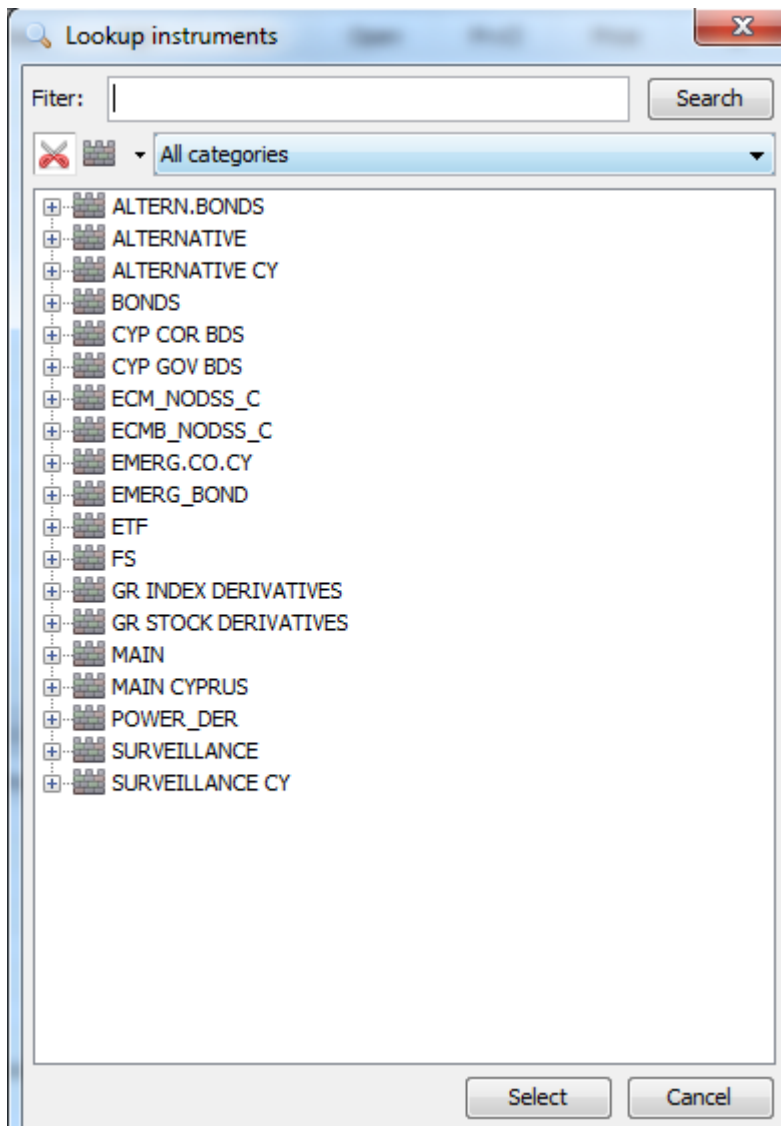

Statistics: Displays the statistics of symbol (week, seven last days, this month, last month, quarter, 3 months, semester, 6 last months, year statistics and 12 last months)

Search symbols under market and type

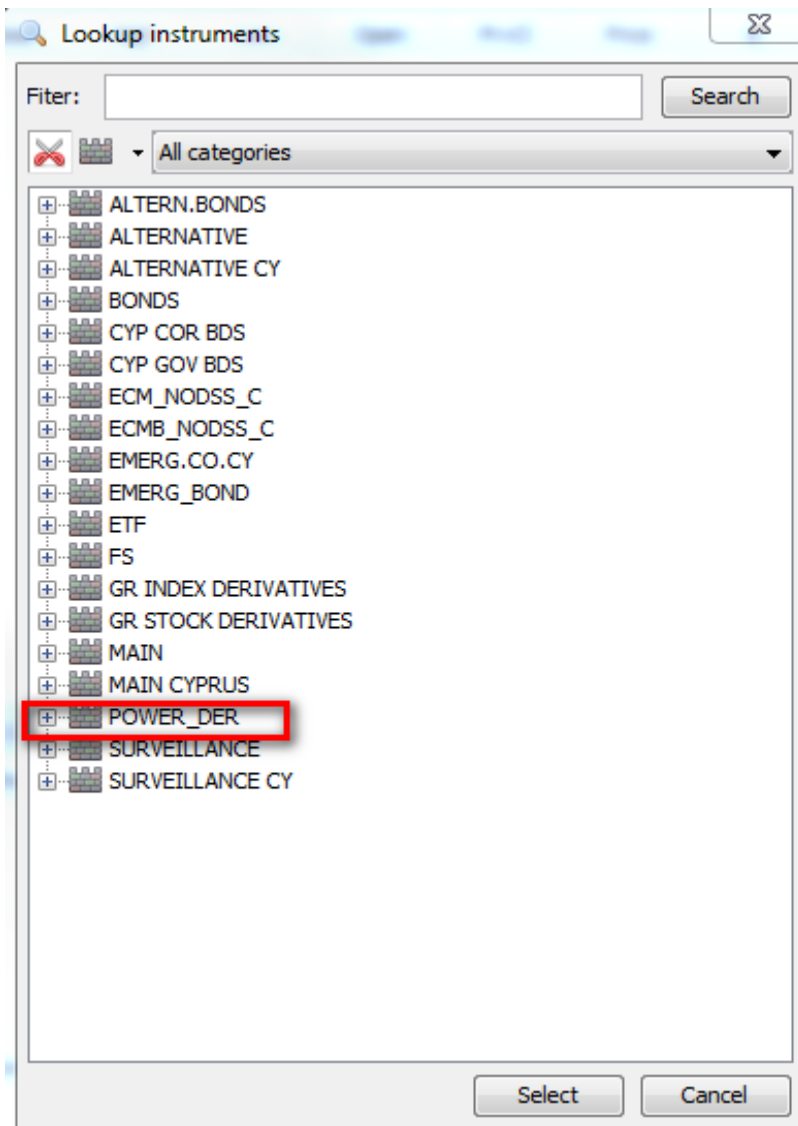

You can follow the steps below to add symbols to a Watchlist window:

- If you know the name of symbol that you wish to add, type it into the textbox and click on the  icon to add it to the Watchlist
- If you do not know the name of a symbol, click on the search icon ; a list of the available markets appears:

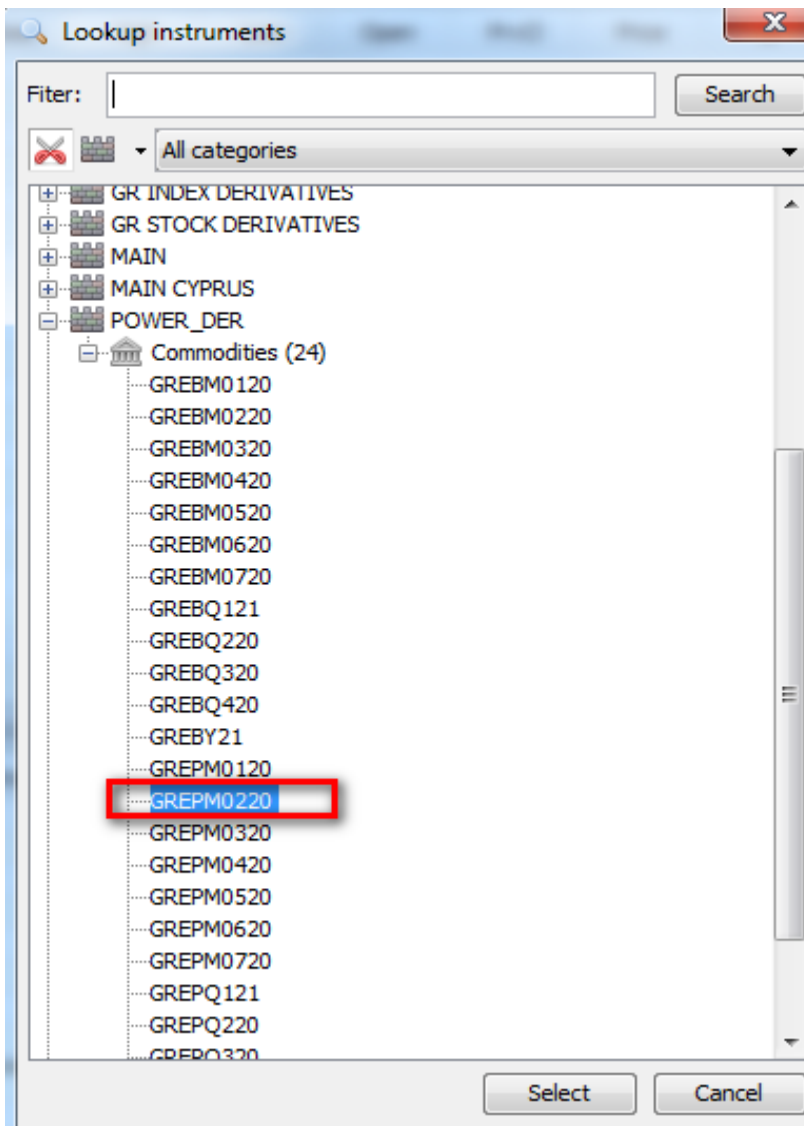

- Select a market (e.g., the Power_Der) and click on the '+' on its left; the instrument types supported by that market appear:

- Click on the '+' on the left of the desired instrument type (e.g. Commodities); a list of all the available symbols of that type will appear:

- Select the desired symbol; the procedure is the same for any other market.

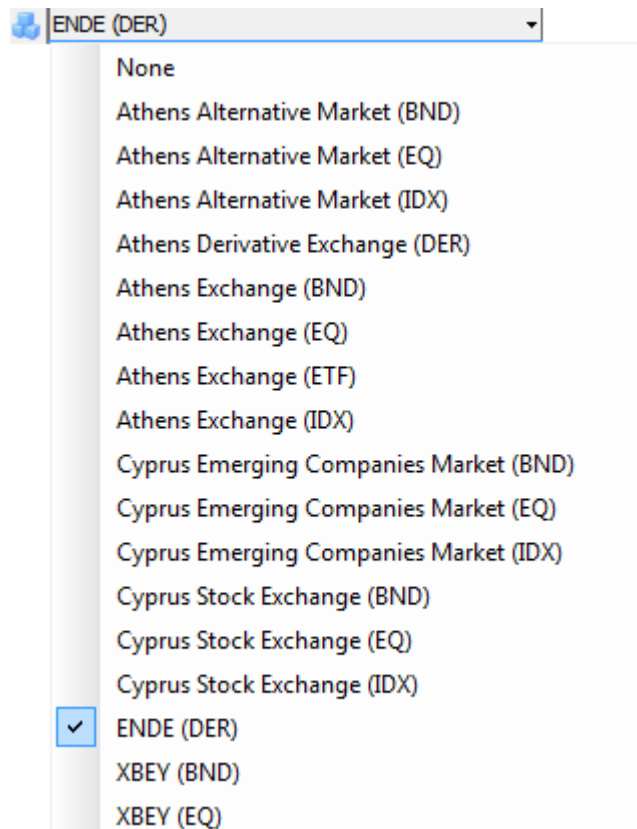

- Having selected a symbol, click on the  icon in the Watchlist window to add it to the watchlist

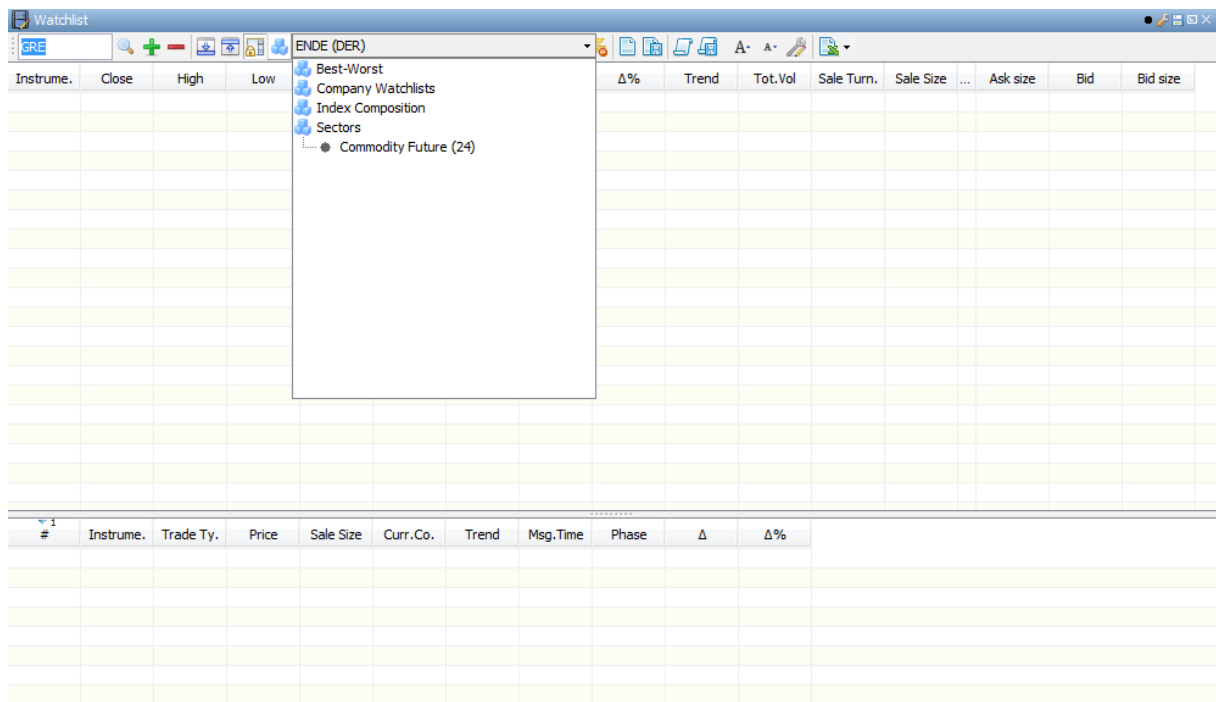

Watching based on market, instrument type and filters

You can watch symbols based on the market to which they belong, on their instrument type and on

specific performance- or tendency-related filters. In a Watchlist window go to the button  . A list of the available markets appears:

After selecting the market that you want to watch, click on Select and a list of performance-based filters will appear:

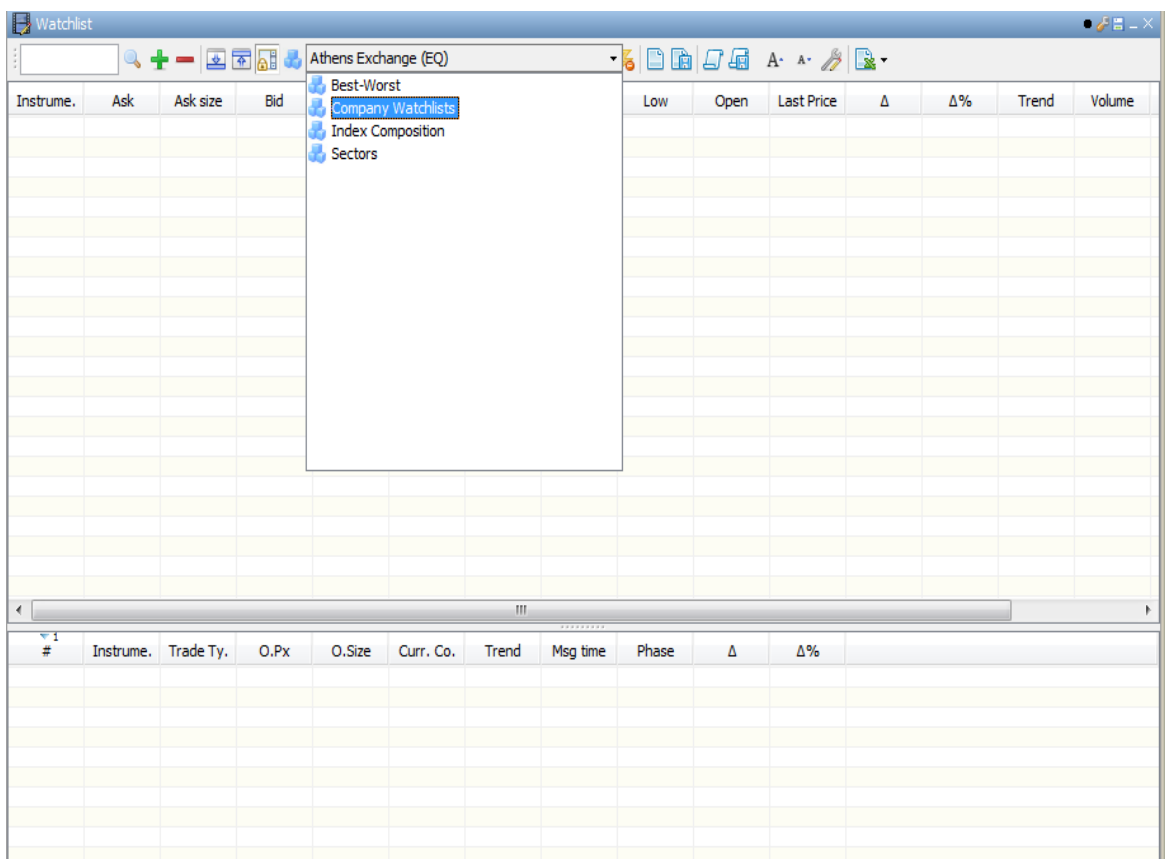

The categories of securities are as follows:

- **Gainers** : Displays the symbols with the best price difference from previous close price (D%).
- **Losers** : Displays the symbols with the worst price difference from previous close price (D%)

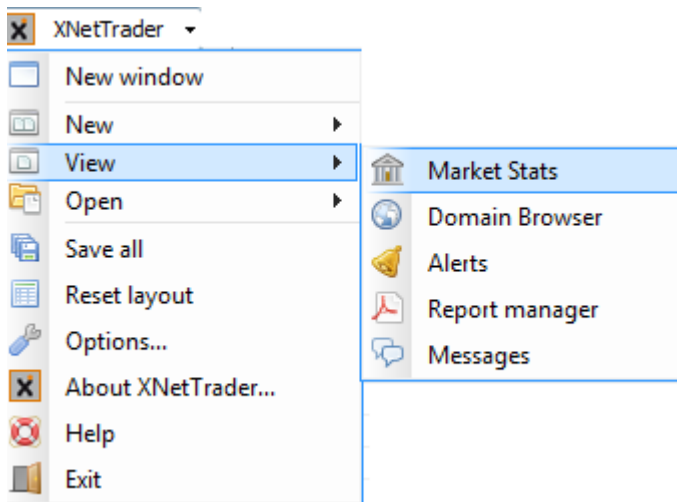

- **Stable** : Displays the symbols with a stable price difference from previous close price (D%)
- **Best Total Volume** : Displays the best-performing symbols based on volume
- **Best Total Turnover** : Displays the best-performing symbols based on turnover
- **Best Merch.** : Displays the best-performing symbols based on merchantability
- **Best capitalization** : Displays the best-performing symbols based on capitalization
- **Best Intraday Range** : Displays the best-performing symbols based on intraday range
- **Sales on Ask Sale Side**: Displays the sales on Ask Sale Side
- **Sales on Bid Sale Side**: Displays the sales on Bid Sale Side

The user also could select a company watchlist in order to watch the symbols from the company watchlist that have been created

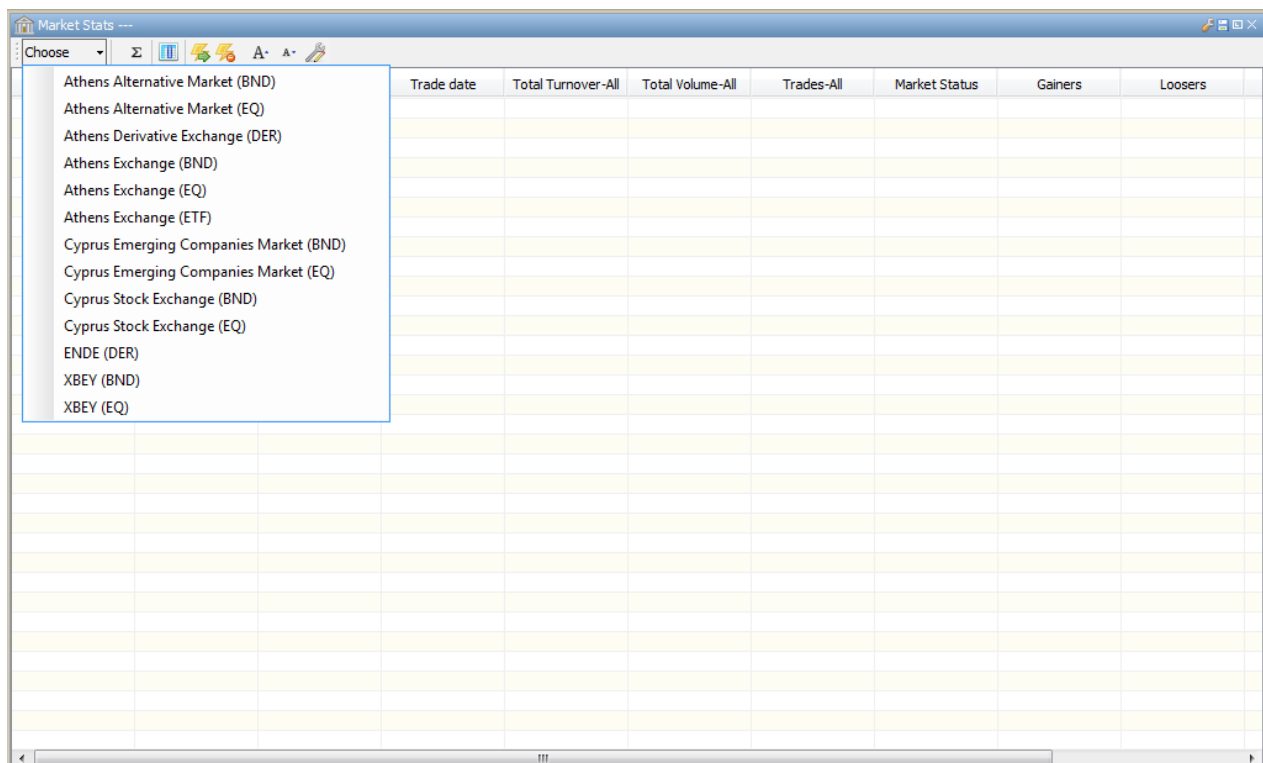

Market Statistics

You can view statistics for a market from the main application menu **Xnet Trader →View →Market stats**. The following window is displayed:

By clicking on **Choose**, a list of markets is shown. Select any individual market or any set of markets (even all) to display statistics for these market(s)

Once you have selected the market(s) for which you want to display statistics, the following information is displayed on the Market Stats window:

| Market Name | Instr.Type | Message Time | Trade date | Total Turnover-All | Total Volume-All | Trades-All | Market Status | Gainers | Losers |
|---------------------|------------|------------------|------------|--------------------|------------------|------------|---------------|---------|--------|

The user may see the statistics per symbol for a week, seven last days, this month, last month, Quarter, 3 last months, Semester, 6 last months, year, 12 last months

Save content of Watchlist Window

Once you have created a watchlist with the symbols that you want you can save this as described below:

In the watch list Window click on the icon  then the following window appears:

Save content of watchlist

Please, give a name for your object

Commodity Future

Available objects

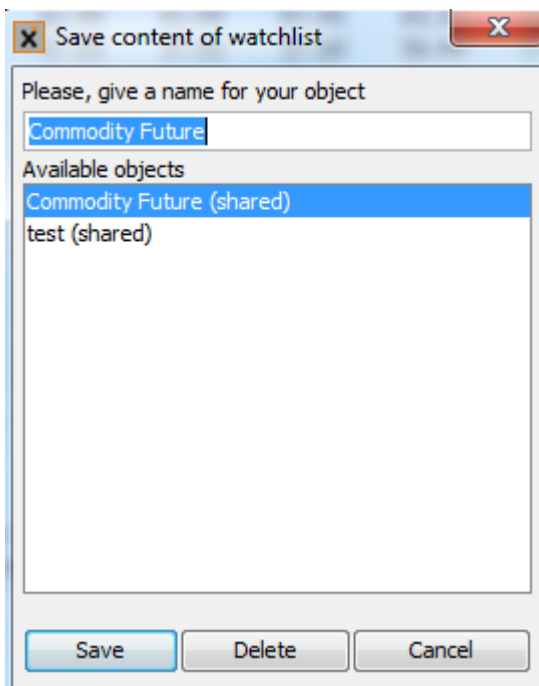

Commodity Future (shared)

Save Delete Cancel

Give the name that you want your watchlist to be saved as and press the **save** button. A confirmation message is displayed, press the **OK** button and the watchlist has been stored. You can also delete the saved watchlist window with the **Delete** button.

Notice: The user could see if a watchlist is common (Shared) with the application Inbroker and IbLite

Load a saved content of Watchlist window

If you have created and saved a watchlist with the symbols that you want to watch, and you want to restore your watchlist window, go to the menu **Xnet Trader → Open → Watchlist** and choose the watchlist from the follow window that appears:

Press the Load button and the Watchlist will be displayed on your screen. You can also delete a Watchlist by clicking on the **Delete** button

Technical Analysis Charts

The application supports a wide range of charts and technical analysis tools.

For Technical Analysis Charts see the follow sections :

[Creating Technical Analysis Charts](#)

[Save a Technical Analysis Chart](#)

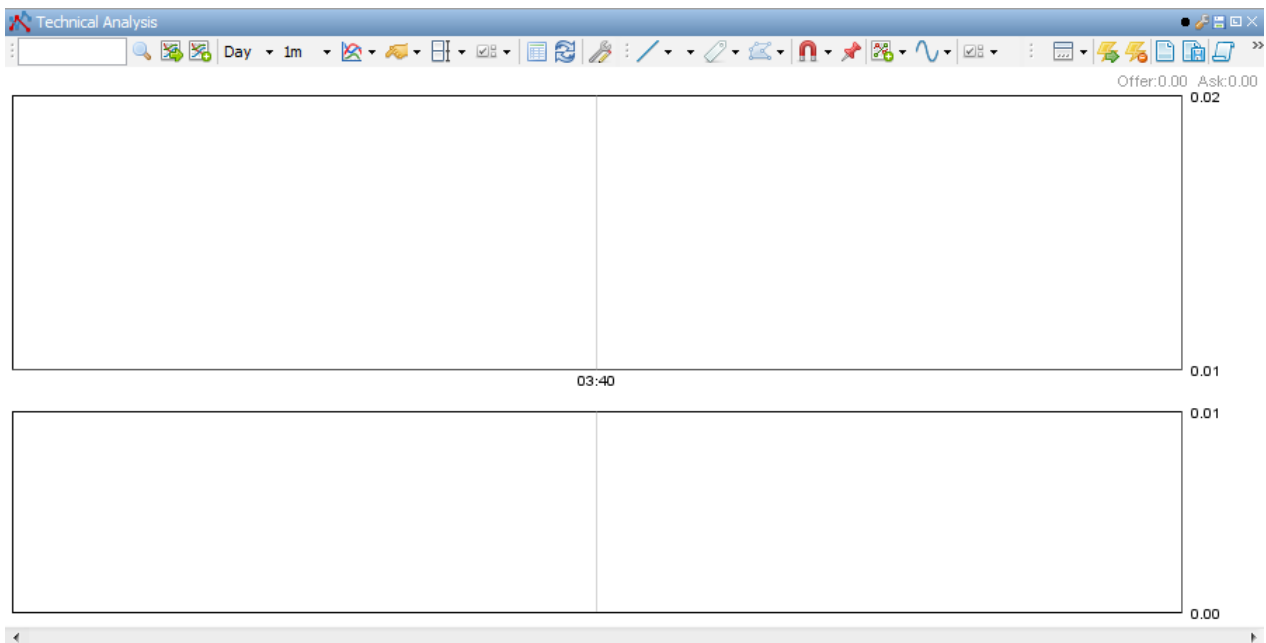

[Load a saved Chart of Technical Analysis](#)

[History Symbol of chart](#)

[Available Columns in the History Window](#)

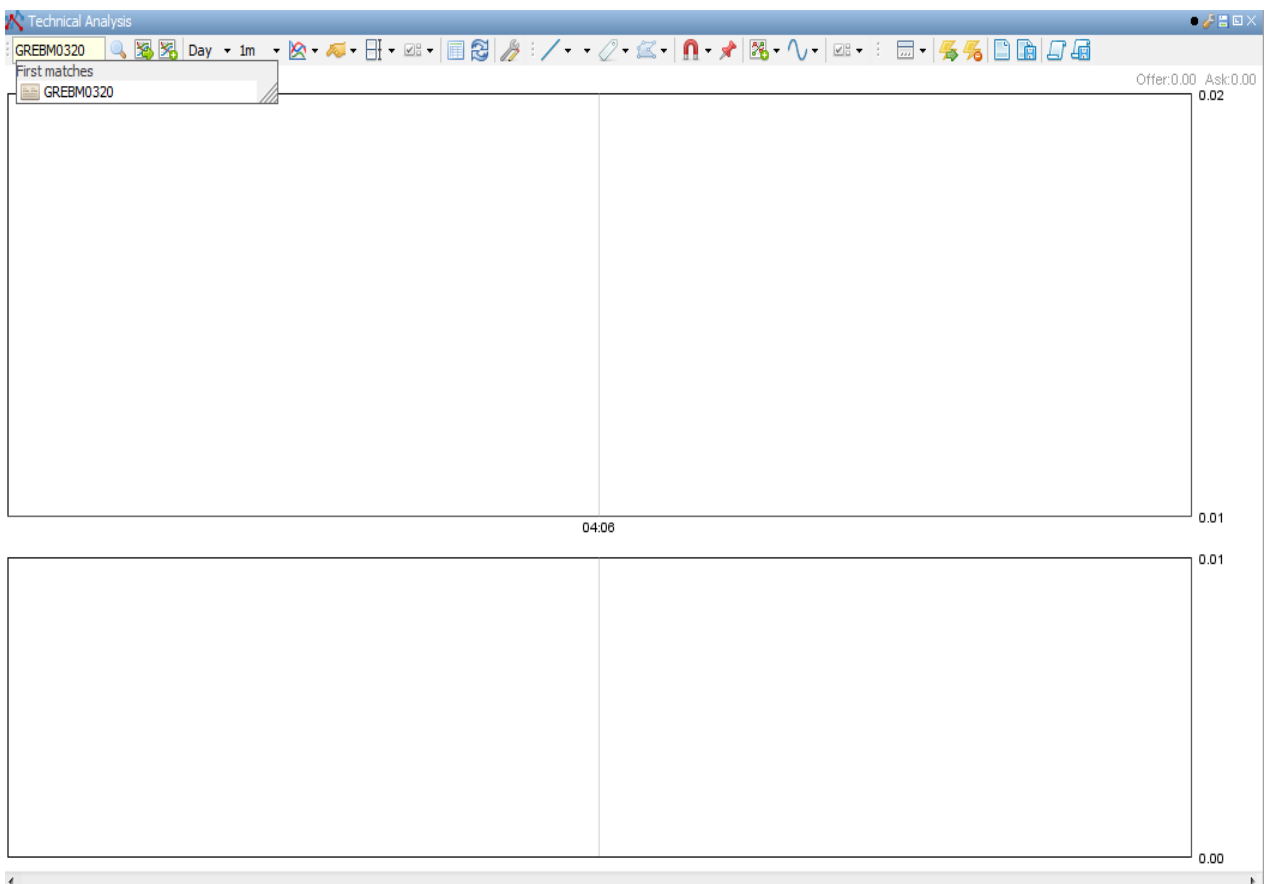

Creating Technical Analysis Charts

From the menu **Xnet Trader** → **New** → **Technical Analysis** you can do Technical Analysis for the symbol that you wish.

In the code field insert the desired name of the security. By pressing the follow icons you have the corresponding options:

 With this icon you can see the main symbol on your chart

 : Add the symbol to the chart window.

5Y : Define the initial duration of the chart

The list includes: 1 day, 1 Month, 1 Week, 2 Weeks , 1 Month, 3 Months, 6 Months, 9 Months, Year-To-Date, 1 Year, 2 Years , 3 Years, 5 years, 10 Years , 20 Years and 30 Years

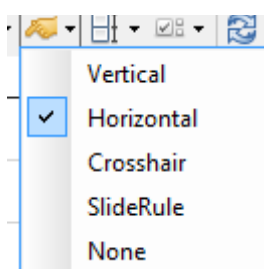

1m : Select the length of time between the chart points. The length of time depends on from the previous selection. If you select 1 week in the previous selection you will see the follow list of time : 1 min , 2 mins , 5 mins ,10 mins ,15 mins , 30 mins, 1 hour, 2 hour, 4 hour ,Daily, Weekly, Monthly, Quarterly, Yearly.

: Select the type of chart

: Select the type of cursor

: Select the type of Y axis

: From this menu select or deselect the following options

By choosing '**Don't ask again**' the confirmation message does not appear again on the same Order Ticket Window. Press **OK** to send the order and with **CANCEL** you cancel the order.

Key combinations for the Price field in order entry window.

In the price field of the order entry window, use can use key combinations in order to see the upper/lower limit, close price, previous close price, etc. By pressing **ctrl and up arrow** the upper price limit of the equity is shown, and by **pressing ctrl and down arrow** the lower price limit is shown. In addition you can increase or decrease the value that you have chosen with the **up / down arrow**. By pressing the **up arrow** on an empty price field the current equity price is displayed and the **down arrow** on an empty price field displays the previous close price. **Alt and up arrow** displays the ask price while **Alt and down arrow** appears the bid price of the equity. On a filled order ticket you can press **Backspace key** in fields symbol , volume and price and you do a quick deletion on these fields . By pressing right click on the price field you can see a list of possible values as shown below:

With this window you can search with criteria of your choice and watch the trades of the orders either entered by you or not, for clients whose portfolios you manage

The search criteria are as follows:

Mine : Select the **Mine** button when you want to see all the trades that you have made

Acct.CSD: The Acct.CSD

Buy : Select the **Buy** button when you only want to watch the trades that have been made by a buy

Sell : Select the **Sell** button when you only want to watch the trades that have been made by a sell

Instrument: : Enter the symbol code or look it up with for the search tool 

Exchange: : Select the exchange that made the trades

: Refresh the trade list window

: Rename the trade list window to the name that you wish

Currency: EUR ▼

: Select the currency of trades

: Hide or display totals in the trade table

: Add or remove information from the Trade List window

: With this icon you save the settings as default configuration for the "Trade List" window

: Delete as default configuration for 'Trade List' window

: Increase for Grid Font (ctrl++)

: Decrease for Grid Font (ctrl+_)

: With this icon you can change the appearance of the trade list window

By pressing right click on a trade that you wish you have the following options:

| Trade List | | | | | | | | | | | | | | | | | | | |

E-mail: inbroker@helex.gr

Change your password

To change the password for logging into the application, press the button Create new password as you can see in the picture below

and write user's mobile phone in order to get a temporary password

A dialog box titled "Reset password" with a close button (X) in the top right corner. It contains two input fields: "Username:" and "Mobile phone:". Below the fields are two buttons: "OK" and "Cancel".

The below message appears which informs the user for the temporary password by SMS

A message dialog box with a close button (X) in the top right corner. It features an information icon (i) on the left. The text reads: "A new password has been sent to your mobile phone. Use it to login. You will need to change it after the first use." There is an "OK" button at the bottom right.

Write temporary password at password field

The XNetTrader login window. The title bar says "XNetTrader". The main area has the "EnEx Energy Exchange Group" logo on the left and the "UAT Derivatives Powered by Athexgroup" logo on the right. Below the logos are login fields: "Username:" and "Certificate:" (a dropdown menu), "Password:" and "Password:" (a text field). There is also a "Language:" dropdown menu set to "English" and a "Save" checkbox with a checkmark. At the bottom are three buttons: "Enter", "Cancel", and "Create new password". The footer shows "Version 6.3.8.0" on the left and "Copyright 2020 AthexGroup" on the right.

the below message appears that informs the user for the expiration of password

An "Expired password" dialog box with a close button (X) in the top right corner. It features a red "X" icon on the left. The text reads: "Your password has expired. Click OK to change it". There is an "OK" button at the bottom right.

At the next picture the user should write a new password in the fields new password and retype new password

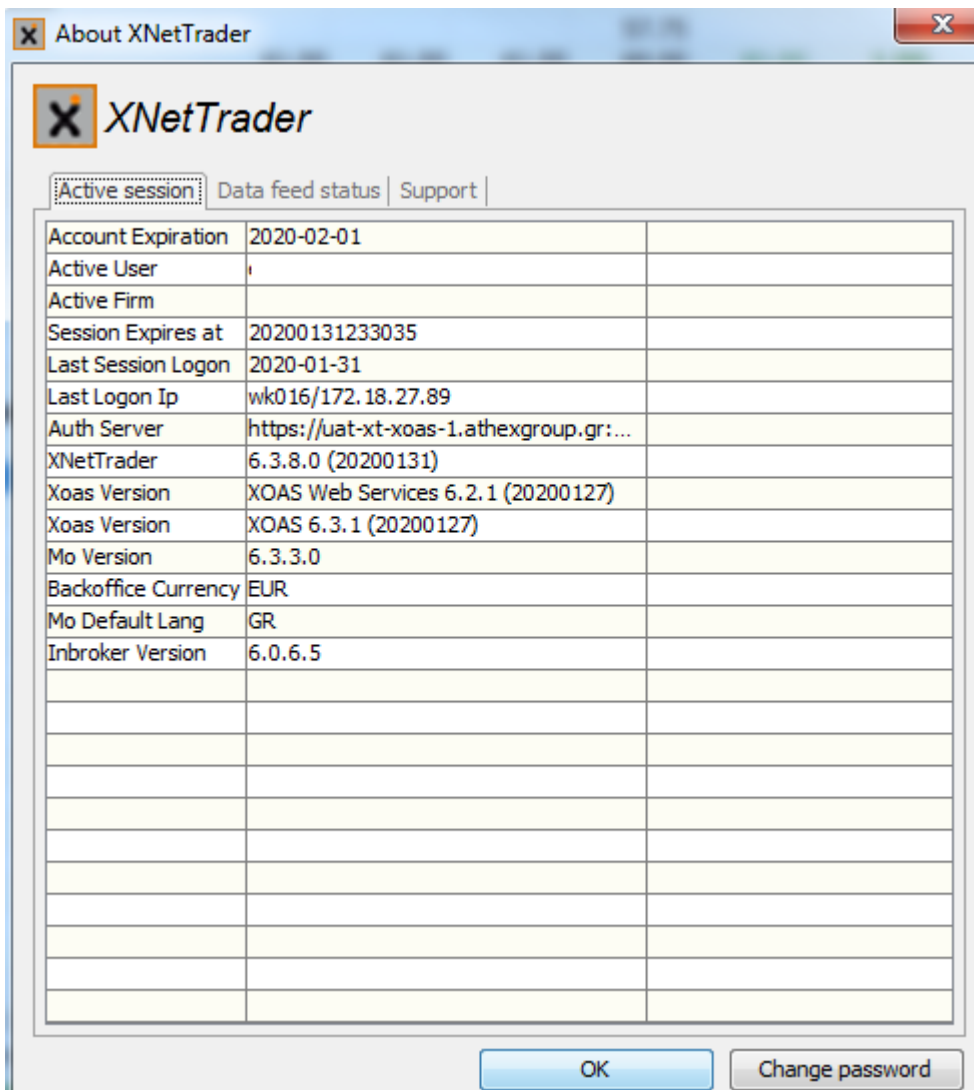

A dialog box titled "Change your password" with a close button (X) in the top right corner. It contains four input fields: "Username:" (with a small icon to its left), "Old password:", "New password:", and "Retype new password:". Below the fields are two buttons: "OK" and "Cancel".

The below message appears when the user changes successfully his password

|Another way to change his password is from the main menu **Xnet Trader → About XnetTrader**. On the bottom right of the window that is displayed there is a "**Change password**" button

In the window that appears fill in your **Old password**, and then your new password in the **new password** field and once again enter your new password in the field **Retype new password**. Then press the **OK** button

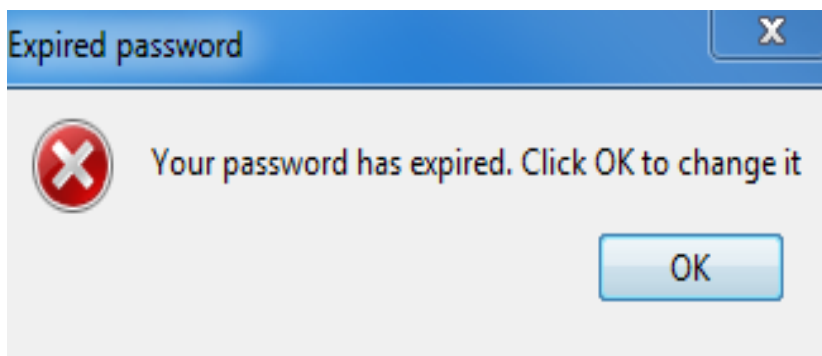

A confirmation message appears that informs you of the successful password change.

You can use your new password on the next logon to the application.

How do you know that your account has expired

When trying to connect to your application the following message is displayed. This means that your account has **expired** and **is not active**.

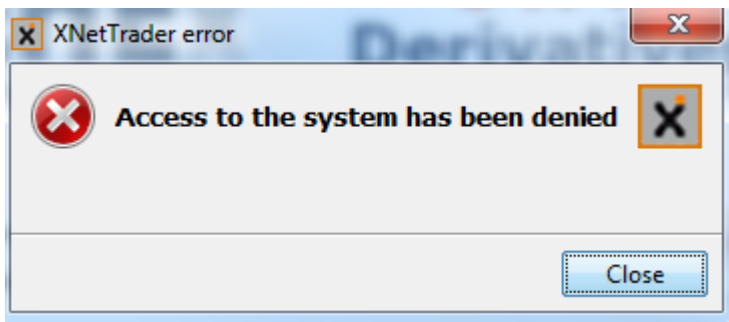

Press OK button and appears the following window

A Windows-style dialog box titled "Change your password" with a light blue header bar and a red "X" button in the top right corner. The main area has a light gray background. It contains four labels on the left, each followed by a text input field: "Username:", "Old password:", "New password:", and "Retype new password:". The "New password:" and "Retype new password:" fields have a small vertical line at the start, indicating password masking. At the bottom right, there are two buttons: "OK" and "Cancel".

Type a new password , retype it again and press OK button

How do you know that you have given the wrong password

After a logon attempt the below message shows that you probably gave the wrong password

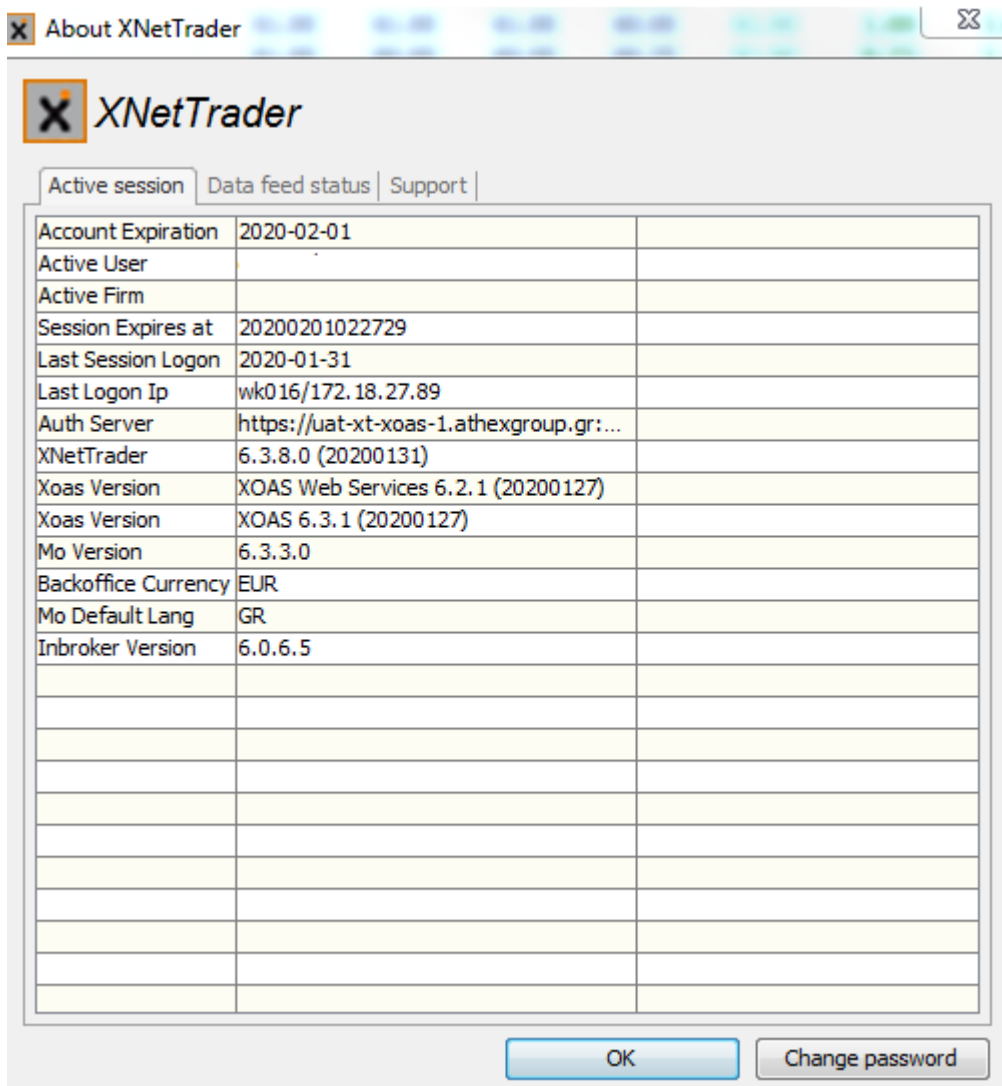

How to send the support data

To send data to the technical support team go to the main menu **MARKETorder** → **About MARKETorder** and press the 'Support' tab. In the "Comments" input box shown, enter any comments describing your problem, and press the "Sent" button and "OK".

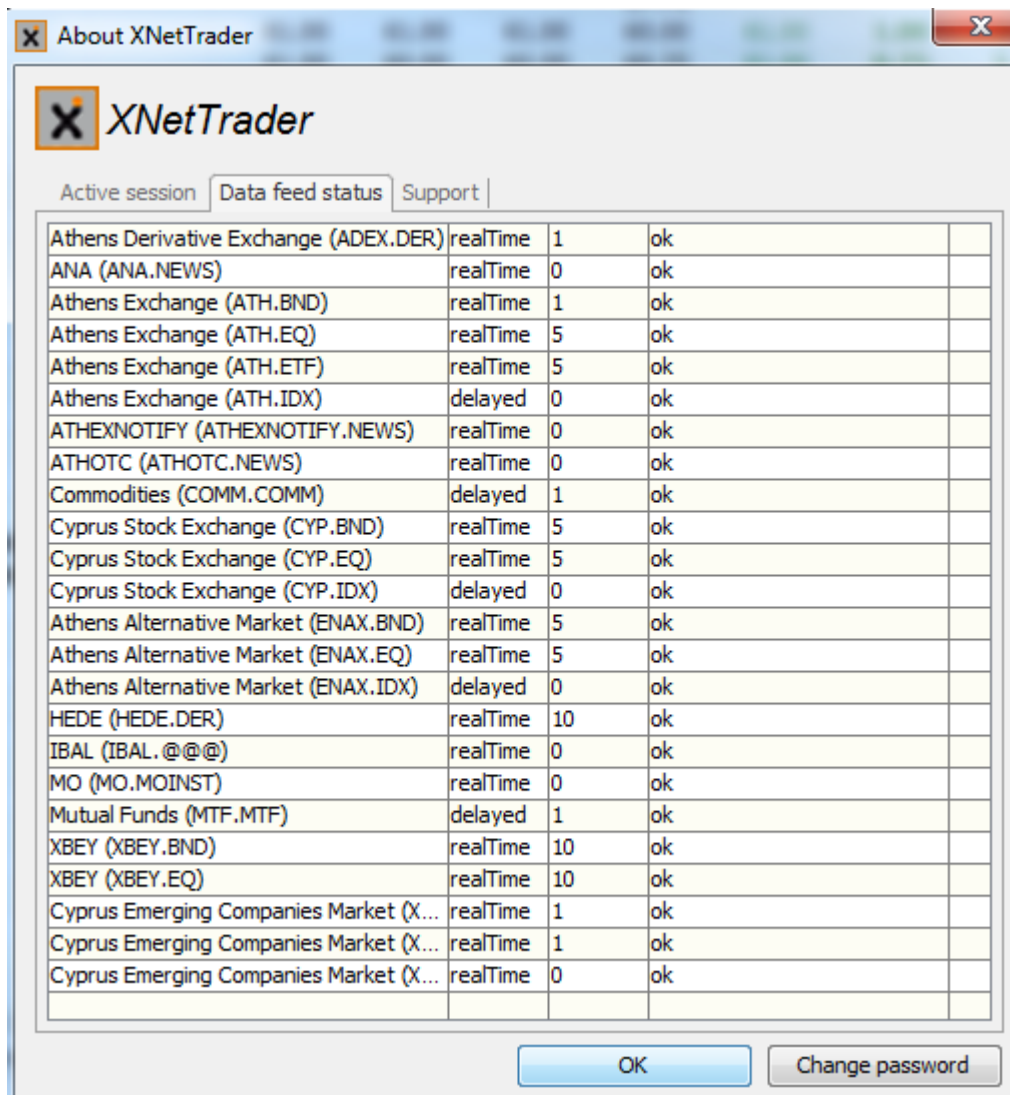

How to view session data

To see information related to your current session go to **Xnet Trader** → **About XT XOMS** . On the "Active Session" tab information concerning your current session is displayed, such as: account name, account expiration date, last logon session, last logon ip, application version, etc.

How to view the data feed status

To view status information on the data feed, go to the main menu **MARKETorder** → **About the MARKETorder**. On the "**Data Feed Status**" tab you can see the markets that have been enabled for the current account, the corresponding time quality (realtime/delayed), the market depth allowed and the network connection status.

Log Messages

From the menu **Xnet Trader → View → Messages**, the following window appears which shows the date, time and application error messages.
